

Felt Board

Objective To teach students the differences between land and aquatic animals.

Materials Aquatic felt board (blue felt may be substituted),
Land felt board (tan felt may be substituted),
Felt animal cut-outs,
Land and sea animal plastic models.

Discussion *Discuss:* Where do people live? Land or water?

Ask: Do we have flippers and fins or arms and legs?

Discuss: Where do dolphins live? Land or water?

Ask: Do dolphins have flippers and fins or arms and legs?

Reinforce that animals that live on land have arms and legs, and animals that live in the water have flippers and fins. (Use the animal models to do this.)

Procedure Pass out felt animals to each student. One student at a time should name their animal and place it in the appropriate habitat.
